

SOFTLINES

GENERAL APPAREL & HOME TEXTILES TESTING

BRING YOUR SOFTLINE PRODUCTS TO MARKET FASTER

Manufacturers must be equipped for growing global trends such as functional garments, eco-friendly textiles and antibacterial fabrics. Our comprehensive solutions span the entire supply chain from product development to retail. Our services ensure that your products comply with the broad spectrum of national and international standards and meet the mandates of their intended markets.

IMPROVE PRODUCT QUALITY – STARTING WITH PRE-PRODUCTION

Our textile and footwear specialists provide a range of technical and laboratory expertise. We independently assess fabric performance at the pre-production stage to help prevent potentially costly errors occurring further along in the manufacturing process.

CATCH PROBLEMS EARLY – SAVE TIME AND RESOURCES

With technical support second to none and state-of-the-art textile laboratories, SGS offers a complete range of industry services to help you verify that your product quality meets or exceeds your buyers' expectations.

LABORATORY TESTING FOR PRODUCT SAFETY PERFORMANCE CRITERIA INCLUDES:

- Performance testing to establish conformity to contract requirements- fabrics, yarn, components and finished products
- Care labeling recommendations
- Safety testing for flammability risks
- Eco-testing, including restricted chemical testing to detect prohibited hazardous substances

TESTS INCLUDE:

- Strength tests
- Flammability tests
- Shrinkage (dimensional stability) and related tests
- Colorfast tests
- Composition and analytical tests
- Construction analysis
- Pilling
- Abrasion

Bring your softline products to market faster by calling SGS today at 800-777-8378 (TEST).
